

INTERNATIONAL INSTITUTE OF
TECHNOLOGY, DESIGN AND
MANAGEMENT VISAKHAPATNAM
AICTE APPROVED

2026–2028 POST GRADUATE DIPLOMA IN MANAGEMENT

Aviation & Logistics (PGDM–AL)

“This specialized PGDM focuses on navigating the complexities of modern aviation management, supply chain and global logistics networks. It uniquely integrates DGCA-certified drone training through the Centre for Drone & Aviation Management (C-DAM) with core management principles, preparing graduates for high-impact roles in airlines, airports, and MRO firms.”

About IITDM Vizag

International Institute of Technology, Design and Management, Visakhapatnam (IITDM Vizag), is an AICTE-approved autonomous business school and a Business Education Alliance Member of AACSB, as well as a member of AMBA-BGA. The Institute is committed to excellence in education, research, and innovation across the fields of technology, design, and management.

Located on a sprawling 34-acre, Wi-Fi-enabled green campus in the vibrant city of Visakhapatnam, Andhra Pradesh, the Institute offers a sustainable and enriching learning environment.

IITDM Vizag delivers a comprehensive and dynamic education for aspiring business leaders through its cutting-edge Post Graduate Diploma in Management (PGDM) programmes. These two-year programmes, with specialisations in Business Analytics with AI, Aviation & Logistics, Maritime & Logistics, and Financial Services (with a major in Financial Inclusion), seamlessly blend theoretical knowledge with practical applications to prepare students for today's fast-paced global business environment.

Programmes Offered by IITDM Vizag

Long-Duration Programmes

PGDM in
Business Analytics with AI

PGDM in
Aviation & Logistics

PGDM in
Maritime & Logistics

PGDM in
Financial Services

Short-Duration Programme

- Centre for Drone and Aviation Management
 - Hands-on experience and DGCA-certified drone pilot training

About the Programme

The PGDM in Aviation & Logistics is a future-ready program designed to address the rapid transformation of the aerospace sector. It focuses on developing leadership skills for logistics, supply chain and international business environments while mastering the technical nuances of aviation law, regulations, and ground handling operations.

The program's competitive "Edge" lies in its dual focus: C-DAM provides hands-on drone pilot training and maintenance certification, while the Start-up Founder Program (SFP) equips students with the resources to launch ventures in aviation tech. With ₹1 Crore startup seed fund assistance and exposure to 30+ essential AI tools, students are trained to handle the psychological and professional demands of high-stakes aviation roles.

Curriculum

The detailed curriculum will be announced shortly and will be aligned with industry requirements and regulatory frameworks.

Who Should Apply

This programme is ideally suited for individuals aspiring to develop into responsible leaders capable of creating meaningful impact in today's dynamic business environment.

- ▶ Demonstrated academic, professional, or extracurricular excellence
- ▶ Readiness to thrive in a rigorous and immersive learning environment
- ▶ Distinct perspectives and experiences that enrich peer learning and classroom discussions

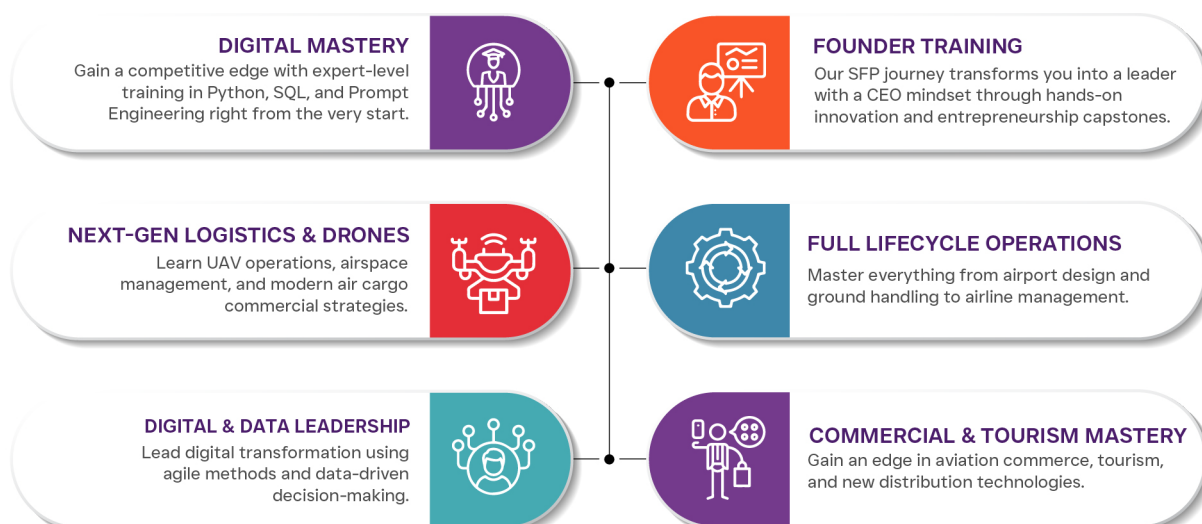

Programme Overview

The curriculum is designed to create industry-ready professionals through a blend of technical mastery and strategic management:

The program starts with normalization in Data Visualization, SQL, and Python to handle complex aviation data sets. Intensive modules cover International Trade & EXIM Documentation, Logistics and Supply Chain mastery with advanced analytics and AI technological skills. Core subjects include Aviation Law, Airport Operations Management, and MRO (Maintenance, Repair, and Overhaul) Specialist training. Exclusive training in Drone Piloting and Agri-applications through C-DAM gives graduates a unique advantage in the emerging UAV market. Modules cover Logistics, Supply Chain Design, Modelling, and Simulation to optimize global air cargo and multimodal transport. Students complete 2-month intensive internships and live projects, often leading to roles as Aviation Consultants or Operations Managers at recruiters like IndiGo, Air India, GMR Group, and Boeing

Mode of Study:	Day-Classroom
Break-up of Credits:	To be announced
Duration:	22 Months
Total Number of Sessions:	700+
Programme Commencement:	June 2026
Summer Internship:	Included
